Assignment 7

using mongoose and express

create two collections

- **user collection**
  - userName
  - email
  - password hashed
  - age
  - gender
  - phone
- **task collection**
  - title
  - description
  - status{toDo , doing , done}
  - userID
  - assignTo
  - deadline

note: don't forget to get user id from token

User APIs	Post APIs
1-signUp 2-login-->with create token 3-change password (user must be logged in) 4-update user (age , firstName , lastName)(user must be logged in) 5-delete user(user must be logged in) 6-soft delete(user must be logged in) 7-logout	1-add task with status (toDo)(user must be logged in) 2-update task (title , description , status) and assign task to other user(user must be logged in) (creator only can update task) 3-delete task(user must be logged in) (creator only can delete task) 4-get all tasks with user data 5-get tasks of oneUser with user data (user must be logged in) 6-get all tasks that not done after deadline
